

What do plants need to grow?	
Light	Plants need light (which they can get from the sun) to grow
Water	Plants need water from the rain, or gardeners can water them
Correct temperature	Many plants need warm weather to grow

Key vocabulary	
edible	Can be eaten
inedible	Cannot be eaten
allergy	A reaction to certain foods that do not bother most people

Seeds	Bulbs
 <p>Poppy seeds</p>	 <p>Onion bulbs</p>
 <p>Sunflower seeds</p>	 <p>Daffodil bulbs</p>

Growing a plant	
	1. Put some soil in a pot
	2. Place the bulb or seed inside the soil
	3. Use a watering can to water it regularly
 	4. Place in a sunny spot so that it gets light
